

This is to register my deep concern that the FCC is even contemplating a revision of the ownership rules for the media moguls. There must not be any further consolidation within the television, radio, newspaper and broadband or cable industries. It is already out of hand, with huge conglomerates controlling what the American public can or cannot see, hear or read. The airwaves are public property and we must not have another debacle like 1996 re-occur in the name of free enterprise. It was nothing of what free markets are about. Please vote NO on June 2.

Thank you,
